

Seasonal grasslands management

Map of works (March/April 2026)

Native grasslands require active management to remain healthy and diverse. As part of our grassland management program, seasonal works will take place in this area to reduce accumulated grass biomass and maintain the ecological health of these areas.

- **Approximate timeline:**
Late March – early April 2026
- **Working hours:**
Monday-Friday, 7am-4pm

Works will include cutting back grasses, reinvigorating wildflowers and removing any weeds, supporting a more balanced and resilient grassland environment.

These works will not impact visitor access to the area. Please visit engagewith.smct.org.au/grasslands to learn more.

For more information about Project Cultivate, please visit our website at smct.org.au/cultivate or contact us at environment@smct.org.au

SMCT acknowledges the Wurundjeri Woi-Wurrung people of the Kulin Nation as the Traditional Custodians of the land on which Melbourne General Cemetery is located and pays respect to their Elders past, present and emerging.
